

About Fiberblaze

- Experts on high performance, wired data communication
- We develop, manufacture and sell FPGA based NICs
- We develop various IP blocks to facilitate sales of FPGA cards
- 5 years in the market
- 20 employee: HW, FPGA an SW developement
- Markets served: Finacial Trading, Telecom, Datacom, Network Test Equipment and Lawful Interception
- Development located in Copenhagen, sales in New York

Current projects

- SmartNIC – a trading framework
- NIC with embedded ARM processors
- Extension to ETLM (a TOE variant) to work with 16k connections.
- FPGA based network appliance. 1U box multiple 10G/40G connections.
