

Benchmarking: Then and Now

Theo Schlossnagle
Founder and CTO

@postwait

This audience is all about performance, all about benchmarks, all about good, informed decisions.

But, does all this stuff you buy live up to its benchmarks
through its lifetime?

You don't know.

Circonus MDI platform ingests high frequency data, stores it and it analyzes it over the entire duty cycle of your equipment and services.

With our patented time-series histogram technology, high frequency
meaning trillions of measurements per second store for years.

Recognize changes in performance characteristics quickly and efficiently.

Trust but verify; STAC but Circonus.

Thank you!
